Role	Name	Date	Signature
Chief Investigator and joint TF3 leader	Julian Matthews		
Principal Investigator of MRC Dementias Platform UK MR-PET Partnership grant (MR/N025792/1)	Karl Herholz		
Joint TF3 leader	Frederik Barkhof		

PREFACE

The contents of this guidebook are designed to assist researchers in the conduct of the PET/MR Harmonisation study and to harmonise activities across the seven centres involved by ensuring standardised and well-designed procedures. The document is structured to enable researchers to be able to read the sections most relevant to their role. Specifically, the document contains:

- An overview to give all researchers an understanding of the study and how their role fits into the research objectives.
- A section on responsibilities which should be read by the principal investigator of each site who will then need to communicate these together with the delegation of responsibilities at each site.
- A section on participant recruitment which should be read by those involved in re-cruitment.
- A section on the study activities with the relevant parts of this section needing to be read by researchers involved in the conduct of these activities.

The guidebook also contains a number of appendices with further information and de-tails for researchers.
